

Dynamic Methods: Company Information

Oct 1, 2026 · @DMS Infra

About Dynamic Methods

Dynamic Methods (also written DMS, Dynamic Methods Solution) is a software development company based in India and Canada. It builds software for clients around the world, from small businesses to large enterprises. The website is dynamic-methods.com.

The company describes its experience in different ways across its pages: "15+ years" on the Services page, "10+ years" serving global clients on the How We Work page, and "Since 2005" in the Services page title. The home page says Dynamic Methods is trusted by 399+ happy customers.

Dynamic Methods provides customer-centric website and mobile app development that delivers tangible business results. Its enterprise services are robust, secure and scalable. Its team of designers and developers builds websites, web portals, enterprise portals, mobile apps and software using current tools and technologies.

Vision

The vision of Dynamic Methods is to explore new opportunities and maximize business value using its core competencies. It aims to deliver information-based, knowledge-intensive services that satisfy its customers.

Mission

The mission of Dynamic Methods is to boost clients' business growth through web design, ecommerce development, mobile application development, software development and digital marketing solutions. It helps clients get great products at affordable prices.

Core values

- **Tech savvy:** the team thinks out of the box and delivers future-ready web and mobile solutions matched to each client's business requirements and goals.
- **Problem solvers:** the team identifies the problems a business faces and finds suitable solutions, whatever the challenge.

- **Dedication:** the team is fully transparent with clients and keeps them informed about project progress.
- **Passion:** the team is passionate about building the best websites and mobile applications, delivering high-performance solutions at affordable prices.

What the company believes in

Dynamic Methods lists eight beliefs: commitment to the best solutions, extended support, a friendly team, robust and high-quality solutions, intuitive services, responsiveness to client queries, top quality, and ethical business processes.

Services offered by Dynamic Methods

Dynamic Methods offers a wide range of services to small and large businesses. The team takes time to understand each client's requirements and business goals, then proposes suitable services. It stays in touch with clients throughout the project lifecycle, and it aims to build performance-oriented solutions that deliver maximum return on investment.

- **Web application development:** custom and secure web apps, built by skilled developers using current tools. The apps are robust and scalable and serve small and large businesses worldwide.
- **Mobile application development:** next-generation mobile apps for various platforms, covering app design, development, testing and maintenance.
- **Custom software development:** software tailored to a client's needs. Dynamic Methods describes itself as an end-to-end custom software development company based in Canada and India, solving software engineering challenges of any nature, scale and complexity.
- **Software product development:** services for startups, small businesses and large enterprises, producing engaging and user-friendly products.
- **Application maintenance and support:** keeps business-critical systems fast and running 24x7, with proactive updates, issue resolution and continuous support. The team can also expand or modify applications.
- **Enterprise application development:** full-cycle custom enterprise app development for clients worldwide.
- **Software testing and QA:** finding and fixing bugs and defects so products work seamlessly.

- **SEO:** keyword research, on-page optimization and strategic link building to improve online visibility and organic traffic.
- **Website maintenance:** updates, security patches and performance optimization.

The contact form also lists these project types: staff augmentation, web development, MVP development, cloud and DevOps consulting, AI/ML development, CMS development, eCommerce development, UI/UX design, digital marketing and SEO services.

Product engineering services

Dynamic Methods lists five product engineering services: MVP development, product development, cloud and DevOps, quality and test engineering, and API management.

Features Dynamic Methods builds

- Users and signup, based on user interface and server-side usability.
- eCommerce platforms with secure payment integration.
- Mobile app features covering functional and non-functional needs, from early performance testing to reliability, scalability and third-party integrations.
- User and social engagement features such as forums.
- Responsive website development, with a focus on high performance and flexibility for fast-growing businesses.

How Dynamic Methods works: engagement models

When clients hire Dynamic Methods for web and software development, they get everything under one roof: designers, developers, business analysts, QA professionals and project managers working together. The company is transparent with all team members and clients. Because every project is different, it offers four engagement models so clients can pick the one that fits their requirements and budget.

Model	When it fits	How it works
Hybrid model	The project needs a technical team onsite who talk to the client regularly	A mix of onsite and offshore setup to complete the project on time, with greater operational benefits and no communication gap

Model	When it fits	How it works
Time and material	The project scope is hard to define	Hourly billing. The client pays for slots in advance, gets a rough hours estimate after a high-level discussion with the team, buys the hours, and receives logs of hours used on a regular basis
Fixed price model	Requirements are well defined and won't change; suits small to medium projects	A fixed scope of work, timeline and cost. The project is broken into milestones and the client pays as each milestone is completed
Hire dedicated team	The client needs designers or developers on an hourly basis	Experienced developers and designers can be hired part-time or full-time depending on requirements and budget, and the client communicates with them regularly to speed up development

Industries, business solutions and clients

Industries Dynamic Methods serves

Dynamic Methods works in healthcare, retail, manufacturing, travel and tourism, education and e-learning, media and entertainment, transportation and logistics, and advertising. For retail, it provides ecommerce and retail solutions for small and large businesses. For manufacturing and for transportation and logistics, it builds solutions and future-ready websites using the latest tools and techniques. It has worked on several education and e-learning projects.

Business solutions (app types)

Dynamic Methods develops these types of apps: food delivery, telemedicine, social media, taxi booking, real estate, ecommerce, dating, live streaming and travel.

Clients

The home page lists these clients among the 399+ happy customers it serves: SmartRX Hub, Smart LTC, Wilson Consulting Group, Ontario Diagnostic Centers, Trillium Innovation and W2o. The home page also lists Digital Operating Models, which it describes as accelerators to evolve a client's way of working, and case studies on Content Management System websites.

Company profiles

Dynamic Methods is listed on DesignRush, iRate.co, Techbehemoths and GoodFirms.

Technologies and development process

Web application development

Dynamic Methods builds web apps with technologies such as Python, Vue.js, Node.js, React.JS and MongoDB, among others. Its web app development services are:

- Web portal development
- Ecommerce web development
- CMS development
- Enterprise web application development
- SaaS app development
- Progressive web app development
- Custom WordPress development

The team builds web-based applications, e-commerce portals, B2B and B2C applications and CMS apps. Its experts follow an agile approach and keep clients informed about progress. The reasons it gives for choosing Dynamic Methods for web apps are an agile procedure, work strategy consultation, customer satisfaction, transparency and competitive pricing.

Mobile application development

Dynamic Methods delivers end-to-end mobile app development for Android, iOS and cross-platform apps. Its mobile services are Android app development, iOS app development, native app development, hybrid app development, mobile UI/UX design, and support and maintenance. Client testimonials mention a Flutter-based mobile app and an

iOS app built by the team. The top reasons it lists for choosing Dynamic Methods are proven expertise, timely delivery, competitive pricing, best-in-class technologies, well-defined processes and complete transparency. It is also known for after-sales support.

Development process

The project process has three stages. The same process is described for web and mobile projects.

1. **Conceptualization:** experienced professionals understand the client's requirements and goals, plan the strategy, and prepare a detailed proposal listing all terms and conditions of the deliverables.
2. **Design and development:** the team keeps complete transparency and takes approval from the client at each stage of design and development.
3. **Testing and launch:** the finished project is tested thoroughly and then launched, so that clients receive flawless projects.

Portfolio: projects delivered by Dynamic Methods

The Dynamic Methods portfolio is titled "Crafted With Love. Built With Passion". It lists 20 website projects and 6 mobile app projects, each with its delivery time and team size. In the table, Devs means developers, TL means team lead and PM means project manager.

Project	Type	Delivery time	Team
Texas Furniture Solutions	Website	3 weeks	2 Devs
Veetoo	Website	3 weeks	2 Devs + 1 TL
Genocide Bamileke	Website	2 weeks	2 Devs + 1 TL
SmartLTC	Website	4 weeks	2 Devs + 1 PM
Trillium Innovation	Website	4 weeks	3 Devs + 1 PM
VPS of Michigan	Website	3 weeks	2 Devs + 1 PM
Project Dignity MI	Website	4 weeks	2 Devs + 1 PM
Glocy Exports	Website	4 weeks	2 Devs + 1 PM
Nookwork	Website	4 weeks	2 Devs + 1 PM

Project	Type	Delivery time	Team
Hortus London	Website	4 weeks	2 Devs + 1 PM
Custom Car Arts	Website	4 weeks	2 Devs + 1 PM
The Wine Box	Website	4 weeks	2 Devs + 1 PM
Cellulars Clinic	Website	4 weeks	2 Devs + 1 PM
Northeast Hotel Supply	Website	4 weeks	2 Devs + 1 PM
Zenith Firearms	Website	4 weeks	2 Devs + 1 PM
Smart Prescriber Portal	Website	4 weeks	2 Devs + 1 PM
PETS 911	Website	4 weeks	2 Devs + 1 PM
DynamicLabs	Website	4 weeks	2 Devs + 1 PM
Boba	Website	4 weeks	2 Devs + 1 PM
ProCam Web Portal	Website	4 weeks	2 Devs + 1 PM
Smart eDoc App	Mobile app	4 weeks	2 Devs + 1 PM
Procam App	Mobile app	4 weeks	2 Devs + 1 PM
World2One	Mobile app	4 weeks	2 Devs + 1 PM
Pizzaiolo App	Mobile app	4 weeks	2 Devs + 1 PM
Ontario Diagnostic Centres App	Mobile app	4 weeks	2 Devs + 1 PM
Attitude App	Mobile app	4 weeks	2 Devs + 1 PM

The fastest portfolio delivery is Genocide Bamileke at 2 weeks. Most projects were delivered in 4 weeks.

Team and developers

The Dynamic Methods website does not publish individual team member profiles. The "Meet the Team" link in the site footer leads to a page-not-found, and the same item in the sitemap has no destination. The details below are everything the site says about its team.

- **Team composition:** clients get designers, developers, business analysts, QA professionals and project managers working together under one roof.

- **Typical project team:** most portfolio projects were delivered by 2 developers and 1 project manager. Some used a team lead instead of a project manager, and Trillium Innovation used 3 developers and 1 project manager.
- **Developer skills:** developers work with Python, Vue.js, Node.js, React.JS and MongoDB for web apps. For mobile apps they work on Android, iOS, native and hybrid apps.
- **Hiring developers:** clients can hire experienced designers and developers part-time or full-time, on an hourly basis, through the Hire Dedicated Team model.
- **Blog author:** the recent blog posts on the site are written by Vikash Parihar.
- **Offices:** the team works from the India headquarters in Ahmedabad, Gujarat and the Canada office in Mississauga, Ontario.

Named team member: the only team member mentioned by first name is Rupesh. Client testimonials on the Client Testimonials page describe him as their main contact at Dynamic Methods, and call him diligent, efficient, helpful and a perfect gentleman. His role and surname are not given on the site.

Product engineering services in detail

Dynamic Methods describes itself as a product design agency offering product engineering services for designing, developing, testing and deploying software products. It provides end-to-end product engineering to clients across the globe, aiming for cost-effective solutions and better return on investment. Its solutions are described as future-ready, data-driven and tech-enabled, and it promises world-class products at affordable costs.

Service	What Dynamic Methods does
MVP development	End-to-end MVP development that implements all of a client's requirements. It has helped several startups test their business ideas and optimize their path to market.
Product development	Stays connected with the client from conceptualization to successful delivery. The team combines design thinking with the latest tools and technologies to build highly customized products.

Service	What Dynamic Methods does
Cloud and DevOps	Assesses, executes and manages cloud and DevOps automation. It offers consultation and migration services and helps optimize product performance for a competitive edge.
API management	Creates, manages and publishes APIs for existing backend services. It chooses the right APIs, customizes them to requirements, or builds APIs from scratch.
Quality and test engineering	Hands-on quality and test engineering using best practices and tools, with end-to-end services for global markets at affordable prices.

Business solutions in detail

Dynamic Methods offers top-class, user-centric websites, software and mobile apps to customers across the globe. Its business solutions page says it serves four types of customer: enterprises, organizations, startups and individuals.

Business solution	Description
Enterprise mobility solutions	Innovative mobile solutions for small and large enterprises, offered as a reputed mobile app development company.
Cloud computing solutions	Helps businesses use the right resources to deliver digital success.
DevOps solutions	Helps a company align and streamline its business goals and accelerate innovation.
Software solutions for startups	Custom software development to help startups grow.
Product engineering solutions	Developing custom commercial digital products.
Digital transformation services	Consulting, strategy and automation services for clients.

The menu also lists nine app types it develops: food delivery, telemedicine, social media, taxi booking, real estate, ecommerce, dating, live streaming and travel apps.

Industries in detail

Dynamic Methods says it offers a wide range of web, mobile and software development solutions to industry verticals across the globe. Its industries page covers eight sectors.

Industry	What Dynamic Methods offers
Healthcare	Effective websites, software and mobile applications for the medical and healthcare sector, with a focus on user experience and a hassle-free experience for end users.
Retail	Digital mobility solutions and personalized ecommerce and retail solutions that drive sales and business growth, with special attention to the UI/UX of retail websites and mobile apps.
Manufacturing	Custom software, websites and mobile apps for manufacturing businesses. Dynamic Methods presents itself as a leading product development company and promises high-quality solutions at affordable prices.
Travel and tourism (shown on the industries page as Travel and eLearning)	Custom travel and e-learning solutions, including websites, mobile apps and software, aimed at maximum return on investment for clients.
Media and entertainment	Quality-assured, SEO-specific websites and mobile apps for the media and entertainment industry.
Transportation and logistics	Web and mobile app solutions with user-centric designs to improve business return on investment. Clients can hire developers for these projects.

Industry	What Dynamic Methods offers
Advertising	Appealing, eye-catching websites and mobile apps, and software development services built around the target audience and business requirements.
Education and e-learning	Smart, easy-to-use platforms that make learning engaging for students of all ages. Custom education and e-learning development services aim to increase user engagement and interaction.

Client testimonials

Clients who reviewed Dynamic Methods on its website:

- Sahak Dulguerian, CEO, praised the team's communication and a clean, intuitive Flutter-based mobile app. He plans to use Dynamic Methods long-term for mobile apps that need to scale across multiple platforms.
- Orville Wilson, CEO, hired Dynamic Methods for a website redesign built with Node.js. He said the team provided wireframes and visual designs, took feedback promptly and revised designs on time.
- Stephen Bradley, CEO, praised the team's work ethic, technical know-how and experience, said it delivered more than expected, and highly recommends it.
- Cameron Robb, CEO of PET, said Dynamic Methods built the platform from start to finish, met every milestone on time, and communicated well.
- Galen Gong, CEO of PET, hired the team through Upwork. He said the team's attention to detail and clear explanations won his trust, and that it delivered exactly the solution he wanted.
- Rosenzweig, CEO, said the team delivered a professional, successful solution to a problem others couldn't fix.
- Jeff Feldhahn, CEO of World2One, said the team did an amazing job on an iOS app project, with technical expertise, creative solutions and regular communication, and exceeded expectations on quality and pricing.

More client feedback from the Client Testimonials page

The Client Testimonials page invites visitors to see how clients turned their ideas into impactful results with Dynamic Methods. It shows reviews from clients in the United States, Netherlands, Malaysia, United Kingdom, Germany, Chile, Uruguay, Switzerland, Denmark and South Africa, with several video testimonials. Reviews that are already listed above are not repeated here.

Reviewer	Country	What they said
Mark Royce	United States	His team is picky about developers but was impressed. Dynamic Methods understood what they wanted, suggested ideas and caught issues the team overlooked, and they awarded it their next few projects directly.
Tony Vesterink	Netherlands	Clear, timely communication, all the skills needed, and reliable from start to finish.
Jihad Nabhan	United States	A hard-working team, strong in Facebook application programming, PHP and MySQL, that respects delivery dates. He finished the first phase of his project with them.
Oliver R	United Kingdom	Good attention to detail, and a good newsletter built for his website.
Karsten K	Germany	Good communication and teamwork, flexible agile development, and mostly on-time delivery despite roadblocks.
Cristian	Chile	Completely satisfied. The team was supportive, went the extra mile and was easy to understand.
Marcel Carpinter	Uruguay	Worked with the team on multiple projects, and it exceeded expectations every time.
Joerg M	Switzerland	Dynamic Methods built an iPhone and Android app, won the contract with a detailed specification sheet, handled technical challenges, and also advised on the website backend.

Reviewer	Country	What they said
Peter R	Denmark	A professional team that made sure each task was understood, and handled extra features and changes without problems.
Jody M	United States	The team integrated three different scanners, payments, an app feedback system, emailing and timed reminder emails, with little direction. Jody hires through Guru.com and rates it among the best.
Matthew L	South Africa	Was beta testing his app when he reviewed it. He says the team is happy to review and modify app versions until they meet his standards, and he expects a smooth launch.
Tom Stone	United States	The team quickly found and fixed an app issue, was responsive and adaptable, and charged fair pricing.
Kevin Summerfield	United States	Several reviews praising excellent communication, attention to detail and quality, and he keeps recommending Dynamic Methods to other clients.

Several reviewers (Pierre P, Bryan Young, Matthew L, Tom Stone and one of the Jeff Feldhahn reviews) mention Rupesh by name as their main contact at Dynamic Methods. They describe him as diligent, efficient, helpful and a perfect gentleman. They also credit him with coaching first-time app owners through the process.
